

Automatic Video Tracking

Our automatic video tracking system has a camera-follow-audio feature that allows end users to have a video recording of their session, display video to large screens (IMAG), or create a video conferencing session without the need of camera operators. The camera-follow-audio system interconnects with the conference microphone system, allowing instantaneous switching of multiple PTZ cameras to automatically focus on the current speaker.

Product Highlights

- > Video switcher controls most HD PTZ cameras including Sony and Panasonic using RS-232 or RS-485 protocol.
- > Video format compatible with multiple formats from NTSC/PAL to 1080p full HD.
- > Control up to 8 cameras with the 8x8 HD-SDI video matrix switcher
- > Interfaces directly with the conference microphone system and conference software to provide seamless integration and easy preset configuration
- > Superb picture quality: 5 megapixel HD COMS Sensor.

Services and Benefits

- > Conference Rental provides the turn-key solution for automatic video tracking including the conference microphones, video matrix switcher and HD PTZ camera
- > Instantly capture any speaker without joystick controllers or camera operators – automatic video tracking makes it easy!
